The secured high-frequency communications facility, located 22 nautical miles east of Omsk, USSR, consists of ten double rhombic antennas arranged in day/night pairs (Items 1-10 Figure 1), two horizontal dipole antennas (Items 11 and 12), one quadrant antenna (Item 13), a control building, and 11 support buildings.

25X1

25X1

Since [REDACTED] the security fence has been extended to the south and ground scarring throughout the antenna field indicates further expansion in the number of antennas to be constructed.

Eleven support buildings of various sizes and functions are located in the southwest portion of the facility. A search of the immediate area around the facility reveals no associated objects or other facilities.
